SUMMARY

Product Manager with nearly 5 years at Mobile World Group (MWG), Vietnam's largest retail group, owning web and app products across its e-commerce, pharmacy and home-service brands and leading a cross-functional team of product owners, designers and content writers. Works across the whole chain, from discovery with users and stakeholders to roadmap and specs, hands-on UX/UI design, delivery with engineering and measuring results after launch. A business development background (P&L, pricing, forecasting) keeps product decisions tied to commercial outcomes, and AI is part of the daily workflow, from research to prototyping and automation. Most recently led the rebuild of Nhà thuốc An Khang's web and new app, reaching VND 5B in online revenue in the first month.

EXPERIENCE

Mobile World Group (MWG) | Product Manager 12/2021 – 07/2026

Web and app products for Thế Giới Di Động, Điện Máy Xanh, Bách Hóa Xanh, Topcare, Thợ Tận Tâm and Erablue Indonesia (2021 – 2024), before moving to the web and app platform of Nhà thuốc An Khang, MWG's pharmacy chain (2024 – 2026).

- Led a team of 8 product owners, designers and content writers; owned the roadmap and backlog with outcome-first prioritisation, and negotiated capacity and scope with IT in monthly planning cycles.
- Ran discovery through stakeholder interviews, on-floor observation and call reviews with sales, customer service, pharmacy, logistics and legal; turned findings into specs, user stories and acceptance criteria.
- Built the design system and trained the team on it; designed flows from wireframe to ship-ready UI in Figma, maintaining high UX standards across all products.
- Set up tracking to measure every launch on revenue, conversion, active users and operational efficiency, and used the results to decide the next iteration.

SELECTED ACHIEVEMENTS:

- **An Khang Digital Platform v4.0 (2026):** Led the feature list, roadmap, specs and acceptance testing for the rebuilt website and a new app, alongside the move to new core systems (Promotion Engine, PIM, Sales Order Management). Split delivery into two phases to meet a 2-month launch window. **VND 5B online revenue** in the first month, **73K daily active app users**, **105K app downloads** in 3 months and **1.5x faster** platform performance.
- **AI Image Search (2025):** Designed the UX and acceptance criteria for finding medicines by photo for both customers and pharmacists. Refined search result accuracy through pharmacist feedback. **2x search volume** and **1.5x conversion rate** after launch.
- **Cancer & Rare-Disease Medication Pre-order (2024):** Built from scratch a pre-order service that gives patients a trusted way to get cancer and rare-disease medications not kept in stock. Aligned sales, pharmacy, customer service, logistics and engineering around one end-to-end flow, followed by consultation call reviews that made callbacks **7x faster**. Average order value is **tens of times higher** than a standard order.
- **Dashboard Automation (2026):** Built a daily and monthly performance report solo with the support of AI, saving **130 to 180 hours a year**. The report serves sales and PM teams as well as C-level leaders, and was later **adopted as the reporting template by other MWG platforms**.
- **Thợ Tận Tâm Agent Tool (2023):** Redesigned the customer-service tool after on-floor observation of agents, **cutting task steps by 75%** and helping each agent handle **1.5x more cases**.
- **Insight Day (2023):** Ran a cross-team discovery programme that turned qualitative signals and customer feedback into a prioritised backlog and shipped **10 major UX improvements in one quarter**.
- **Erablue Indonesia (2022):** Compiled the market research deck for MWG's expansion into Indonesia and led the UX for Phase 1, which covered the information architecture, the design system and a UI tuned to local shopping habits. The website now averages **31K daily users**.
- **Topcare, Apple Authorised Service Platform (2022):** Built the digital channel for after-sales service operations, reaching **85K daily users**.

Hoa Binh House (Hoa Binh Group) | Business Development Team Leader 2019 – 2020

- Led leasing strategy, pricing and annual occupancy forecasting for office assets, coordinating the sales team and key stakeholders.

Digiworld (DGW) | Business Development Manager, Nokia 2018 – 2019

- Owned revenue planning, P&L, inventory, pricing and sell-in/sell-out forecasting across the distribution network.

SKILLS

Product: Product strategy and roadmap, discovery, Agile/Scrum, backlog and sprint planning, specs and user stories, prioritisation and trade-offs, stakeholder management, impact measurement

UX & Design: User research, usability testing, information architecture, interaction design, responsive design, design systems

Data & AI: GA4 tracking and funnel analysis, Data Studio dashboards, AI-assisted prototyping and workflow automation

Tools: Figma, GA4, Data Studio, Microsoft Clarity, Notion, Google Workspace, Google Apps Script, GitHub, Claude

Languages: Vietnamese (native), English (professional working proficiency)

EDUCATION

Keyframe Multimedia | UX/UI Digital Product Design Certificate 2020 – 2021

Foreign Trade University | B.A. Finance & Banking (International Finance), GPA 3.41 2012 – 2016
